

HYPERSENSITIVITY

It is a well known fact that certain individuals, for undetermined reasons, may be allergic or hypersensitive to foods, drugs, cosmetics or any other substances or materials that are harmless to most people. The relatively few people who are subject to such reactions are said to be allergic or hypersensitive.

MAKE THIS PRELIMINARY PATCH TEST 48 HOURS BEFORE EVERY APPLICATION.

To ascertain whether you are hypersensitive or allergic to this product you must make this preliminary patch skin test 48 hours before application.

1. Prepare the test mixture by mixing a small quantity as directed.
2. Apply a few drops of the mixture to a previously washed area the size of a small coin on the inner fold of the elbow.
3. Allow the test area to dry and leave uncovered and undisturbed for 48 hours.

During or immediately after the 48 hour period, if any burning, swelling, redness or irritation shown in or around the area, then it must be assumed that you are allergic to the product and must not use it.

This product must not be applied to the lashes or hair if the skin nearby shows evidence of any abrasion or soreness.

1000HOUR™

Eyelash & Brow Dye Kit

INSTRUCTIONS

*Instead of applying mascara daily, use
1000 Hour™ once every 4-6 weeks*

- **12 Applications**
- **Waterproof, Smudgeproof**

INSTRUCTIONS

When applying to someone else.

1. Make sure lashes are completely clean by removing natural oils as well as make up with a non-oily cleanser.
2. Trace out two eye-pads onto paper towelling, then cut to shape as traced (see over).
3. Squeeze into the mixing cup about 2.5cm (1") of cream. Add 10 drops of liquid and mix together well using the wand provided.
4. Apply a liberal film of vaseline using a cotton bud to one side of each eye-pad, then adhere the pads to the skin as close as possible to the bottom lashes. (See diagram over.)
5. In a lying down position with eyes closed (must be kept closed for next 12-15 minutes) apply mixture using wand in the same manner as applying mascara, i.e. upward strokes catching bottom lashes and the tips of the top lashes. Now do downward strokes to the top lashes.
6. With eyes still closed leave on for ten minutes. Avoid opening eyes as this may cause irritation.
7. With eyes still closed use dampened cotton wool balls to remove any residual mixture. Use downward strokes first then use upward strokes.
8. Remove pads and eyes can now be opened. Using dampened cotton buds remove vaseline and any residual mixture. Slight stinging may occur which is a normal reaction, if it persists for more than one minute flush with an eye bath of cold tap water.

Things you need:

1. Paper towelling
2. Dish of cold tap water
3. Vaseline
4. Cotton wool balls
5. Cotton buds

For colouring brows and other hair follow the same instructions leaving the mixture on for about 6 minutes, and removing it using only dampened cotton wool.

IMPORTANT

Avoid getting mixture into the eyes. If this occurs, immediately flush with cold tap water.

The peroxide effectiveness is diminished after one year from opening. Also, for hygienic reasons please dispose of this product one year after opening.

Date Opened: _____

WARNING: This product contains ingredients which may cause skin irritation to certain individuals, and when used for eyelash & eyebrow tinting may cause injury to the eye. A preliminary patch test according to these directions should be made before use.

KEEP OUT OF REACH FROM CHILDREN

SAFETY DIRECTIONS: Avoid contact with eyes (eyelashes & eyebrows acceptable) and skin. Preliminary skin patch test is acceptable only when conducted according to enclosed directions.

FIRST AID: If product gets into eyes wash out immediately with water. If skin contact occurs flush skin with running water. If swallowed do NOT induce vomiting. For advice, contact Poisons Information Centre (AUSTRALIA Ph: 13 1126; NEW ZEALAND Ph: 0800 764 766) or a doctor at once as urgent hospital treatment is likely to be needed.

1000HOUR™
Eyelash & Brow Dye Kit

INSTRUCTIONS

When applying to yourself.

1. Make sure your lashes are completely clean by removing natural oils as well as make-up with a non-oily cleanser.
2. Squeeze into the mixing cup about 2.5cm (1") of cream. Add 10 drops of liquid and mix together well using the wand provided.
3. Apply a film of vaseline to the areas immediately above and below the lashes.
4. Apply the mixture to the lashes using the wand as if you were applying normal mascara and leave on for ten minutes.
5. Using a slightly dampened cotton bud remove most of the mixture with gentle strokes away from the eye. Close your eyes and now use slightly dampened cotton wool to remove the remainder. Slight stinging may occur which is a normal reaction. If it persists for more than one minute flush with an eye bath of cold tap water.
